

Header and Footer Testing Suite

Document Type:Technical Report

Version:1.0

Status:Draft

Author:EasyJavaPDF Team

Date:Loading...

Pages:Multiple

This document serves as a comprehensive test for header and footer functionality in PDF generation. It demonstrates various scenarios including:

- Multi-page document structure
- Consistent header and footer placement
- Page numbering systems
- Document metadata display
- Professional document formatting

The testing scope includes verification of header and footer elements across multiple pages, ensuring consistent formatting and proper page break handling. This document intentionally spans multiple pages to test pagination features.

When testing this document, use the `headerFile` and `footerFile` parameters in your API request to include custom header and footer HTML files. The headers and footers will appear on every page of the generated PDF.

Component	Minimum Requirement	Recommended	Notes
Java Version	Java 21	Java 21+	Required for Spring Boot 3.x
Memory	512 MB	2 GB	For optimal PDF processing
Storage	100 MB	1 GB	Temporary file storage
CPU	1 Core	4+ Cores	Multi-threaded processing

Headers can include dynamic content such as document title, chapter names, page numbers, and timestamps. The header HTML is processed and applied to every page.

Footers typically contain page numbers, copyright information, and document metadata. Ensure footer content is concise to avoid layout issues.

To test headers and footers, create separate HTML files for header and footer content, then include them in your API request:

```
curl -X POST http://localhost:8081/api/v1.0/print \ -F 'htmlFile=@4-  
header-footer.html' \ -F 'headerFile=@header.html' \ -F  
'footerFile=@footer.html' \ -F 'jsEnable=false' \ --output header-footer-  
test.pdf
```

This section contains sample content to demonstrate how headers and footers appear across multiple pages. The content is designed to span several pages to test pagination.

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Sed do eiusmod tempor incididunt ut labore et dolore magna aliqua. Ut enim ad minim veniam, quis nostrud exercitation ullamco laboris nisi ut aliquip ex ea commodo consequat. Duis aute irure dolor in reprehenderit in voluptate velit esse cillum dolore eu fugiat nulla pariatur.

Excepteur sint occaecat cupidatat non proident, sunt in culpa qui officia deserunt mollit anim id est laborum. Sed ut perspiciatis unde omnis iste natus error sit voluptatem accusantium doloremque laudantium, totam rem aperiam, eaque ipsa quae ab illo inventore veritatis et quasi architecto beatae vitae dicta sunt explicabo.

Nemo enim ipsam voluptatem quia voluptas sit aspernatur aut odit aut fugit, sed quia consequuntur magni dolores eos qui ratione voluptatem sequi nesciunt. Neque porro quisquam est, qui dolorem ipsum quia dolor sit amet, consectetur, adipisci velit, sed quia non numquam eius modi tempora incidunt ut labore et dolore magnam aliquam quaerat voluptatem.

The most basic test involves simple text headers and footers. This ensures that the header and footer positioning works correctly across all pages.

Advanced testing includes dynamic content such as page numbers, timestamps, and document metadata. This requires proper integration between the header/footer system and the PDF generation engine.

Headers and footers should support CSS styling including fonts, colors, borders, and background colors. This test verifies that styling is preserved across all pages.

This section contains extended content to ensure the document spans multiple pages, allowing for comprehensive header and footer testing.

Test Case	Description	Expected Result	Status
Header Positioning	Header appears at top of every page	Consistent placement	Pass
Footer Positioning	Footer appears at bottom of every page	Consistent placement	Pass
Page Numbering	Sequential page numbers	1, 2, 3, 4...	Pass
Content Separation	Main content doesn't overlap headers/footers	Clear separation	Pass
Styling Consistency	Header/footer styling preserved	Consistent appearance	Pass

This document has successfully demonstrated the header and footer functionality across multiple pages. The consistent placement and styling of headers and footers ensures professional document presentation.

- Test with different header/footer designs
- Verify page numbering in various formats
- Test with multilingual content
- Validate with complex layouts
